We don’t just grow innovations, we grow value.

Tobacco filler grades

Nexfill™, a natural tobacco filler substitute, is currently available in two FCV (Flue-Cured Virginia) grades, Lemon and Orange.

Orange—designed to deliver a mellow, riper taste profile
Lemon—designed to deliver a brighter Virginia taste profile

Each grade has a consistent particle size and mix effectively with existing blends. And quality remains highly stable between, and across, production lots.
